quik-CLIP™

U.S. Patent No. 12,716,436

INSTRUCTIONS

WWW.GETQUIKCLIPS.COM

Meet Your Ultimate Organizer!

Quik-Clips make it easy to hang, remove, and switch out papers with just one hand.

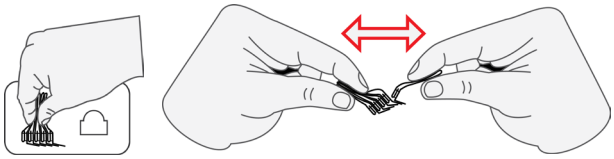

Make better use of your space without thumbtack holes in your papers or walls.

Try them wherever you need a Quik-Clip!

Remove from Packaging

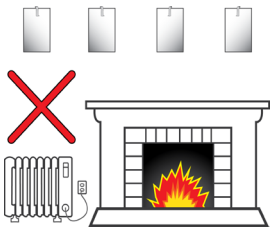

1. Pinch clips and pull out of packaging.
2. Separate as shown to avoid damage.

3. Handle clip from the sides. **Avoid touching the backside**. Finger oils can reduce adhesion.

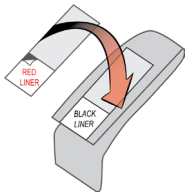

Prepare Surface

1. Use on a smooth, flat, clean and dry surface.
2. Avoid dusty, oily, wet, textured or treated surfaces.
3. Wipe gently with rubbing alcohol. Do not use household cleaners or water. **Allow to dry completely.**

Apply 3M Command™ Adhesive Strip

1. Remove the **red text** liner and attach adhesive to the backside of the Quik-Clip.
2. Position straight up and down, centered horizontally and flush with the bottom.
3. Press firmly on black liner with thumb for **10 seconds** to form strong bond.

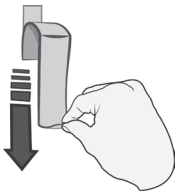

Mount Quik-Clip

1. Peel off the **black text** liner.
2. Position clip straight up-and-down.
3. Press firmly into the wall for at least **30** seconds.
4. Wait **1 hour before use** to allow adhesive to fully bond.

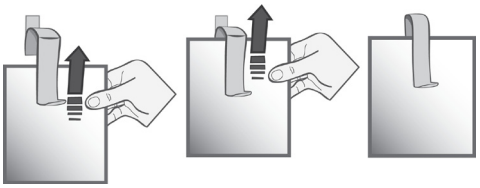

How to Operate

1. **Never** pull the tab towards you.
2. **Gently** pull the tab **straight down along the wall** until the top part is horizontal, then release.

3. Center paper underneath and slide it upward toward the surface until you hear the magnets "clip" securely around the paper.

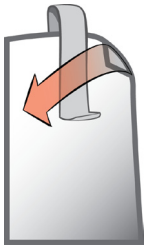

One-Handed Operation

Holds **10+** sheets of standard copy paper. **Recommended limit:** 60 grams per Quik-Clip. Weight, thickness and slick surface can reduce grip. Use multiple clips when needed.

Reset to Open Position

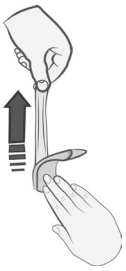

1. Slide fingers behind paper and grip near the center.
2. Pull paper briskly towards you and to either side to fling the clip open.
3. The clip will drop into the open position.

Magnetic surfaces: Clip may not hang open, but still clamps normally.

Remove from the Wall

1. Hold Quik-Clip gently with one hand.
2. Fold ribbon down to expose adhesive strip.
3. Stretch the strip **slowly** straight up against the surface until it releases.

Trying something new? **Test the hold first.** Avoid items that could be damaged if dropped.
